

# DSC-5 HR and People Survey analytics

2017-12-13

Summary - This should be less than the length of a tweet - 280 chars. This should be very clear/concise - probably the most important part. **WARNING Please remember that everything in this template is public facing! WARNING**

## Team members

- Bob
- Alice

## The need

- What are we trying to improve?
- How might this be useful?

## Impact

- What is the impact in terms of public good? (if any)
- How will we share this - published work including code-base, presentations, training courses etc.
- Who is using?
- Any awards or feedback (e.g., comments, tweets)?

## Data science

- What's new, innovative, shiny, difficult, interesting about this?
- What is the data science **stack** ? E.g., algorithms, ML methods, programming languages etc.
- Does it use ONS infrastructure or expertise, or extend capacity in some way?

## Stakeholders

- Who are the Partners / stakeholders?
- Who are we working with?

## Code and outputs

- What are the outputs? For example, a data product, repo, paper.
- Links to (public) Github repositories.

## Related and existing work

- Links to related research, other groups (inside + outside gov)
- Related + similar projects

## Delivery

Use the - [ ] format to specify a general delivery timeline. Mark completed parts with - [x].

- [x] **January 2019** Project started
- [x] **March 2019** A milestone
- [ ] **August 2019** Another milestone
- [ ] **December 2019** Estimated delivery
